

Service and Support from Dedicated Professionals

Cabling & Cable Connector Installation

*A flexible
program capable
of meeting
your needs*

Overview

We can provide cable and cable connector installation services in most situations. Accurate estimates of installation costs, selection of cable, and choosing installation methods require a preinstallation site evaluation and complete system specifications. Our involvement can range from running and terminating all cables to supervising a cable specialist or electrician followed by testing and connector installation.

Options

- Install all unexposed wiring and attach cable ends.
- Subcontract installation of unexposed wiring and attach cable ends.
- Attach cable ends on wiring installed by you.

Eligibility

- Cable specifications must be accordance with the National Electric Code.
- You are responsible for informing us of any local codes which are more stringent than the NEC.
- If you provide the cable, it must meet or exceed the recommendations from our Preinstallation Evaluation.

Recommendations

We recommend that you use the highest quality cable available.

Pricing

Cable installation prices are always provided as an estimate, based on standard Time & Material rates. Contingencies include: building structure, local codes, local union requirements, access, subcontractor charges, and anything beyond our control which makes installation more time consuming than anticipated.

Contact our sales representative for pricing guidelines, based on travel time, length of cabling, number and type of cable end attachments, and labor.

Limitations

- Does not include cable system design.
- Cable installation and connector installation will be done in accordance with specifications provided. No warranty of fitness for purpose will be provided ♦
