

# Integration Services

*Integration Expertise. We turn the components of your information system - the hardware, software, cabling and more - into a functioning tool for your business*

## **EMF Inc.**

HEADQUARTERS  
60 FOUNDRY STREET  
KEENE, NEW HAMPSHIRE 03431  
603/352-8400 FAX 603/357-9442

An Affiliate of **ISSI**

### **Overview**

EMF's Integration Services are designed to take hardware and software *components* and integrate them into an information *system*.

Whether integrating upgrade components into a small LAN network or Unix system or tying several branch LANs into an enterprise WAN, EMF can provide the expertise, the staff and even the material. We can plan, stage, configure, install, train or troubleshoot existing integration problems.

### **Features and Benefits**

The major benefit of our Integration Service is that we assume complete responsibility for all aspects of getting your system - new or an upgrade - up and running.

Often Integration Services are preceded by an Information Systems Design. Otherwise, we can integrate based on your plans and needs.

You determine the scope of services. We can work with your staff, your software supplier, or handle the job ourselves. Services are available for small systems or

large. We can integrate entire LAN or WAN systems or simply add a mail gateway.

### **What's Covered**

- Compatibility engineering: hardware platform, software applications, cross platform interconnectivity, mixed system environments, LAN and WAN
- Cable Installation, coordination, and management.
- Site evaluation and planning
- Installation and cut-over planning
- Equipment and software procurement
- Staging - assembly, configuration, burn-in, test
- On-site installation, multi-site coordination
- Configuration and tuning
- Documentation, training

### **Pricing**

Standard Consulting rates apply. Contact your sales representative for an estimate or a proposal.
